

“TRASH TRAP” AT WORK

1

TRASH FLOATS
DOWN STREAM

2

TRASH IS
DIRECTED TO THE
TRAP & RECYCLED

3

TRASH FREE WATER
FLOWS THROUGH
WATERSHED

ABOUT TRASH TRAPS

When it rains, stormwater runoff flows into drains and pipes that feed into our creeks and lakes, carrying with it litter and other pollution that degrade water quality and harm aquatic life.

To combat this, the City of Hickory and Catawba Riverkeeper have partnered to capture trash before it is carried downstream into the Catawba River through this trash trap on Horseford Creek.
